# EQODRY®

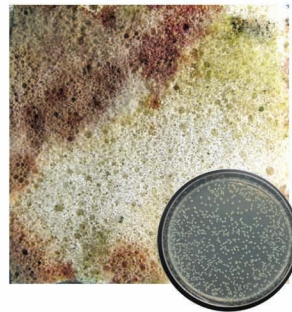

smart all-weather foam

Eqodry® – pronounced as 'e-co-dri' – is manufactured with an open cell structure that allows water to pass through for zero water retention and fast drying times, which makes it perfect for outdoor furniture and marine applications where moisture can shorten the foam's lifespan. Eqodry is fire retardant and protected from mold, fungi and bacteria by Ultra-Fresh® antimicrobial. Incorporated during the manufacturing process, Ultra-Fresh keeps the foam fresh, clean and odor free.

Eqodry is manufactured in four qualities – soft, medium, firm and super-firm – to meet comfort requirements for a variety of applications. The foam is available in precut buns/blocks and slices, as semi-finished cushions and pillows, and also by weight in a mixed crushed foam option.

Treated with Ultra-Fresh®

Regular untreated foam

Foam treated with Ultra-Fresh® antimicrobial technology has 99.9% fewer bacteria compared to untreated foam. Eqodry® is a registered trademark of Kingsford (Hong Kong) Ltd. Ultra-Fresh® is a registered trademark of Thomson Research Associates, Inc.
